## U. F. A. Convention At Cereal Nominates Lorne Proudfoot

Hon. J. F. Lyburn outlines work done and legislation passed by U.F.A. government.

Norman Stuart of Chinook elected President of Acadia U.F.A. Political Association.

Lorne Proudfoot, M.L.A.'s unanimous choice of the U.F.A. convention held in Cereal last Wednesday, as candidate in the coming provincial election, was given a very hearty ovation by the delegates present.

The major portion of the afternoon session was taken up with discussions on regulations, the more important of which dealt with the Farm Loan Board, the natural resources of the province, the gasoline tax and reduction in automobile licenses.

The following were elected to office in the Acadia U.F.A. Political Association: Mr. Norman Stuart, Chinook, president; Mr. Robert Shaw, Oyen, vice-president; Directors: Division No. 1, W. S. Hendry, Blandford; and H. E. Francis, Bonnie Brier; Division No. 2, Mrs. Roberts, Lanfume and E. B. Allen, Heathdale; Division No. 3, Doug Smith, Cerealand Cecil Paterson, Youngstown; Division No. 4, Mrs. T. O. Stephenson of Oyen and H. H. Diehl, Stibbald; Ray C. Anderson of Oyen was re-appointed secretary treasurer.

The evening session in the form of a public meeting was addressed by Hon. J. F. Lyburn, who outlined the work done and legislation passed by the U.F.A. government. Lorne Proudfoot, M.L.A., also addressed the meeting.

Sixty-seven delegates from various locals in the constituency attended the convention, and each session was well attended by visitors.

The Cereal Women's Institute served an excellent supper between the afternoon session and the evening meeting.

## Cementing of Casing Completed At Fuego

The work of running the 4 1/2 inch casing at Fuego, and cementing same has been completed, and officials believe that a very successful job has been made.

It is now considered definitely proven that the water coming into the well does not come from the limestone but from a point higher up. This will mean a great deal to this field as there has been considerable uneasiness among oil men in regard to it, and a tendency to slow up development work here.

Water coming into a well in the vicinity of the oil producing horizons is an emergency that oil men dread, and it has given great satisfaction to officials of the Fuego Oil Co., to find that this is not the case in their well. It not only makes this well more valuable but will mean much to those holding leases and oil rights in the vicinity of the Fuego field.

It is the intention of the company to drill through the cement the latter part of next week and it is expected that a very spectacular display will be witnessed when the well again commences to blow. Anyone

## Independent Electors Hold Convention In Cereal

William Denton Will Consider Accepting Nomination As Independent Candidate

The convention of electors of Acadia constituency, held at Cereal yesterday afternoon, to consider nominating an Independent candidate, was attended by about 140 delegates. W. Robinson, Esq., chairman, opened the meeting, which soon warmed up to a general discussion of provincial affairs in which the government and the member for this constituency came under fire and were severely criticised by several speakers including J. W. Robinson, Esq., (chairman of the convention), William Denton, Benton, A. J. Trewin, Oyen, Andrew Anderson, Alaska, and C. H. Harris, Oyen. Lorne Proudfoot, U.F.A., candidate was given the privilege of the platform to reply to the criticisms levelled at himself and the government.

There was some discussion as to the length of time he should be given. It was suggested that 10 minutes was long enough for any member to tell what knew about the government (laughter). A motion that he should be given thirty minutes carried; but Mr. Proudfoot said he would only talk 10 minutes anyway. Mr. F. C. McClean, barrister, Oyen, engaged in a sally with the U.F.A. member and the meeting became a little hard to handle. It was evident that a number of U.F.A. supporters were anxious to have the convention endorse their candidate but a motion that an Independent candidate be nominated, carried, and six names were brought before the meeting.

Those nominated were: Andrew Anderson, Alaska, William Bredin, Cereal, William Denton, Benton, Dr. J. P. Kerr, Oyen, George Morrison, Oyen and A. J. Trewin, Oyen.

Each nominee withdrew his name. William Denton, who appeared a popular choice of the convention was asked to reconsider his decision and report his intentions within one week.

The meeting adjourned with the singing of the national anthem.

## Third Fortnightly Crop Report

Issued May 28, 1930.

During the first week of the past fortnight the weather was generally clear with slightly higher temperature prevailing. Local rains occurred in the Southern and Eastern parts of the Province. High winds were of frequent occurrence and some damage resulted due to soil drifting.

On May 20th a heavy wind swept over the Province particularly from Olds to Lacombe and eastward, doing damage to crops sown on summer fallow. In the Edmonton district the wind was followed by rain and snow, the greatest snow being

(Concluded on page 8.)

desiring to see the well in action, should phone the company's office in Oyen next week for information as to when drilling will be recommenced and the probable time of the well commencing to blow.

### A Hobby Essential To Life

Every person, old or young, should have a hobby. And why a hobby? Because a hobby means an interest beyond the mere task of making a living and because an interest is necessary to the enjoyment of life.

Life without interest would be a dull, prosaic affair. Yet there are some people who keep their noses to the grindstone day after day, year in and year out in a dull routine to provide the wherewithal to feed, clothe and shelter themselves and their dependents, without a let-up from daylight to dark. They never look around for some interest which will serve to brighten their lot and bring joy into their lives.

There are, of course some men who are fortunate enough to have found in their vocation that keen zest which an outside interest gives to others. Yet it has been found by a few less experienced that even such happily circumstanced individuals can and do pursue their work with better results and with greater contentment and less wear and tear when, to their work, they add a hobby.

"All work and no play makes Jack a dull boy" has been quoted so often that it has become platitudinous. Yet it is just as true today as when it was first uttered.

When the child puts his books away and closes his school desk for the day, he proceeds to enjoy himself with games and recreation in some form or another and in this manner revivifies himself for another day at school. Educators have discovered that the child who plays in heaven brings to his school work an enjoyment which enables him in the long run to outstrip the pale faced bookworm. He has a balanced and therefore a happier existence.

And so with the adult. But in place of playing kites or indulging in the hot air of the grown up, he carries his enthusiasm into the field of some sedate, but just as stimulating amusement. It matters little whether it is collecting postage stamps, indulging in politics, playing saw and hammer or engaging in some form of academic study, so long as it is something which arouses the interest of the participant and whets his appetite for more; and so long as it is something different from the daily task.

It is this creation of interest which acts as a stimulus to the mind or a recuperative power to the physical being. It is at the same time restful and invigorating. This is why the individual with a second string to his bow, even if it is only used for recreational purposes, is more likely to make a success of life than one without it. He is able to turn again to the serious work of making a living with the hope and joy which comes with a buoyant spirit, a rested body and a clear, refreshed mentality.

It is impossible to pursue a hobby without securing these results, provided it is kept within reasonable bounds, for recreation broadens interests and interest means life. Interest with existence is life. Life without interest is mere existence.

The time to develop interest is in youth. It is too late to wait until the pains and penalties of advancing years are taking their toll and forgoing retirement from active work. The individual who waits until he is obliged to slacken the traces on which he has been pulling heavily for decades before looking around for an interest will find he faces an old age of misery, for he has developed nothing to which he can turn to make his declining years worth living.

The youth, the middle aged, the old, of both sexes should have a hobby and should develop a hobby in comparatively early life.

#### Explores Old Theory

Plants do no harm in sleeping rooms at night, says a plant expert of the U.S. Department of Agriculture, for "a whole greenhouse full of plants would not give off enough carbon dioxide to injuriously affect the composition of the air."

#### Graded Beef In Demand

Officially graded beef is now being served in the dining rooms of the British House of Commons and in many London Clubs. House and restaurant proprietors are also serving it, and the London housewife is beginning to ask for it.

#### What's In A Name?

Not Very Much As Proved By Book Publishers

"What's in a name?" seems to be clearly defined as the subject of a questionnaire recently sent out by a firm of book publishers in an endeavor to ascertain what sells books.

The 10,000 replies received to date show that only 199 purchased the book because of their titles. More than 3,450 sales were attributed to reviews; 2,460 to advertisements and so on, through the recommendation of a friend, reputation of the author, bookstore display, interest in subject, gift, lecture or sermon, with the title at the bottom of the list.

#### Uruguay's national anthem is in 70 verses.

#### Prevention Better Than Cure

Annual Examination By Doctor Would Ensure Good Health

The annual conference of the Canadian Social Hygiene Council, at Toronto, made one sound recommendation to the public. That was to have an annual examination by a doctor.

It is a trite saying that prevention is better than cure. When a person feels well, or rather if a person does not feel ill, or is not bothered by a pain of any kind, the assumption is that the organs of the body are functioning normally, but the fact that so many people are taken ill suddenly, proves the fallacy of that belief.

Health should not be taken for granted, simply because one is apparently well. It should be proved by test, and if there is a condition that betokens a breakdown of the inner machinery of the body in the near future, the doctor can repair the damage, or stave off the evil day, before it has gone too far.

Many a man or woman has got a nasty jar on visiting a doctor about some minor trouble and being told that something serious is developing, or has developed. The average being does not like visiting a doctor, and usually leaves it until circumstances compel examination, but an enormous amount of sickness, an enormous number of operations, would have been avoided if the habit of having an annual examination were universal.

Many of our people are more careful about the interior works of their automobiles than they are about the interior works of their own bodies.

### THE ANAEMIC GIRL

Who Has Lost Her Charm and Beauty

"She seems to be losing her looks." This remark is often heard about girls who were once noted for their sparkling eyes, their rosy cheeks and their shining hair. It is not far to seek—they have become anaemic. That accounts for the pallor and the loss of charm. The anaemic girl, if she neglects her health, may be a sufferer all her life.

"Take heed, you pale, anaemic girls. Plenty of iron and blood is what you need and rest will help you. But what you need most is a healthy body. Those wretched headaches that fiddle about your temples and those terrible hair complaints can only be banished by a rich, red and pure blood."

Good blood—the kind that brings good health is created by Dr. Williams' Pink Pills. The whole mission of these Pills is to build rich, red, healthy blood. The Pills are sold by all dealers in medicine by mail at 60 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

#### Trade Deer For Bear

Heading back to the old days of barter, Winnipeg's Public Park Board closed a deal with the Park Board of Port William. A husky bear is being traded for a deer. The deal was made in exchange for two red deer. Each board paid freight on its own consignment.

### Heart and Nerves

Caused Her To Have Cold Hands and Feet

Mrs. Joseph Price, Red Pine, N.B., writes: "Several years ago I was troubled with my heart and nerves and was so bad, at times, my hands and feet would become numb and cold."

"I happened to see

MILBURN'S  
HEART  
NERVE PILLS

advertised and started taking them at once. I continued for some little time, and since then I have had no return of my trouble."

Price, 50c, a box at all druggists and dealers. Write for a free receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

## SCIATICA?

Here is a never-failing form of relief from sciatic pain:

Take Aspirin tablets and you will avoid needless suffering from sciatica—lumbago—and similar excruciating pains. They do relieve and they do not harm. Just make sure it is genuine.

**ASPIRIN**

TRADE MARK REG.

#### When Grain Kings Meet

Valuable Information Will Be Exchanged At World's Exhibition

In midsummer of 1922, the city of Regina will become the clearing-house for world thought and knowledge, every important branch of field-crop production and marketing. Agrarian experts from all around the globe will gather at the World's Grain Exhibition and Conference to be held at the Saskatchewan capital in late July and early August.

While some \$200,000 has been awarded for cereals, grass, clover and vegetable-seed exhibits, separate sessions of the grain conference in conjunction with the exhibition are expected to be a most important portion of the program. Papers are to be read on agronomy, economics, including marketing, milling and baking, agricultural machinery, insect pests and friends, and other subjects.

English and French, it has been decided, will be official languages. Provision will be made for interpreters. It is contemplated that brief resumes of all papers—two average lengths is limited to 2,000 words—will be printed in the two official languages and circulated to delegates before commencement of sessions. The meetings will be held during the mornings of the two-week conference.

Feasibility of a short series of purely scientific conferences is envisaged by the executive of the Regina gathering; if such a series is found to be necessary, the meetings will be arranged so that they will not conflict with regular conference sessions.

#### It Bids Pain Begone—When neurosis, the nerve or laminae

cripples the back is the time to test the virtues of Dr. Thomas' Electric Oil. Well rubbed in it will still the pain and produce a sensation of ease and rest. A trial of it will establish facts.

#### Pope Pius Has Gold Telephone

Instrument For Personal Use Is Ornamented With Mother-O'-Pearl

The Pope's small state of 500 inhabitants soon will have what is probably the most exclusive telephone exchange to population in the world. With the installation of a new system there will be 800 numbers, of which 600 shortly will be in use.

Pope Pius' personal telephone will be of massive gold, bearing the Pontifical seal and ornamented with mother-of-pearl. He will be able to telephone anywhere without his call passing through the exchange. Special private lines also will be installed for the Secretary of State and other dignitaries.

#### As the Scots Said

The news that Weihaiwei is being relinquished by Britain to China may recall to a few old-timers Pura's cartoon of more than thirty years ago, showing two aged Scots engaged in the following dialogue: First Scott—"Ah see we hae Weihaiwei." Second Scott—"Hae we?" First Scott—"Aye, we hae."

#### Use Minard's for Burns.

A catalogue of dietary tads for women has just been issued by a London group.

Old medicinal gardens of Japan date back at least to 702 A.D.

#### First-Aid

For all pains and aches, foot troubles, cuts and bruises, or general massaging purposes, Minard's simply can't be beaten.

**MINARD'S**

**MINIMENT**

#### An Accidental Discovery

Scientists Find Fish Scales Can Be Used As Fabric Coating

For hundreds of years Eve has taken her clothes from the wool of sheep and the skins of animals, and now she has gone one better—she is to wear the scales of fish.

It is intended, also, to use a coating of artificial pearl on oil tank coats. These latest rain-proof garments will be light and completely waterproof, and when wet they will have a beautiful pearly glitter.

The discovery that fish scales could be used for this novel purpose was more or less accidental. Scientists were endeavoring to improve the process by which artificial pearls are made when they stumbled across the new idea.

After several attempts they found a method of washing, drying and grinding fish scales which produced a fine crystalline powder. This is mixed with a solution of artificial silk in collodion, and can be painted thinly over the oil skin.

Persian Balm is irrefragable. Fragrant as summer flowers, Cool as a mountain lake, it is wonderfully soothing, soothing and whitens the hands. Makes skin soft-textured and youthful. Used by women as a powerful hair restorative and as a perfect aid to lovely complexion. Used by men as an effective hair fixative or having lotion. And for children, soothes and protects their tender skin like the delicately cool Persian Balm.

#### Reindeer Trek Halted

Will Not Resume Journey Until Fawns Can Travel

Three thousand reindeer, being driven across "the top of the world," into Canada, on the order of the Dominion Government, have halted their long march in the Klondike and Colville River sections, until the end of the thawing season.

The herd will wait there until the new-born deer are strong enough to join the drive, which follows a route north of the Arctic Circle across Alaska to the Mackenzie River basin, of the Canadian Arctic.

#### Minard's Checks Falling Fair.

Market For Salt Increasing The Canadian production of salt except for small exports is sold in Canada principally to the dairy, meat curing, fisheries, and chemical industries, and as table salt for household use. The market for salt in Canada is steadily increasing.

Deevish, pale, restless, and sickly children owe their condition to worms. Mother Graves' Worm Expeller will relieve them and restore health.

According to an English weekly paper, the police always stop the traffic to let Mr. George Bernard Shaw cross the road. The idea of stopping Mr. Shaw to let the traffic pass is said to have been abandoned years ago.

**WRIGLEY'S**

When you need new energy, when you are bored and weary, dry—pep up with Wrigley's—It makes you feel new and throat.

The increased flow of saliva feeds new strength to the blood, you can do more—you feel better.

Keep awake with Wrigley's

Western Province Benefits

Will Offset Succession Duties On Estate of English Baronet

Revenues of the province of Saskatchewan will benefit to the extent of \$14,351 by way of succession duties on the estate of Sir John Lawrence Langham, Bart., who died recently in London, England, and whose will it now being probated. Sir John left \$1,002,926, of which \$277,062 is in Canada, \$183,052 in Alberta, and \$48,300 in Saskatchewan real estate. The Saskatchewan property under the Succession Duty Act of the province, will be taxed at the rate of 17 per cent.

For treatment of caked bags in cows, apply Dr. Douglas' Egyptian Liniment—the quick, sure remedy. Saves time and expense. Prevents blinched stock.

Paris has restricted automobile parking in the central area to thirty minutes, and physicians have banded together to ask for exceptions of this hampering regulation.

#### Campers Carry Minard's.

The Italian government is making strenuous efforts to assist the olive oil, wine and other basic industries.

EVERY BIRD LOVER should have a new revised edition of "The Bird Book of Birds" by Minard's. It is a complete guide to the care and feeding of every bird, and is a most useful reference on the treatment of birds.

The regular price is 25 cents, but to readers of this paper who mention THE NEWSPAPER UNION, MINARD'S, 100, BROADWAY, NEW YORK, will send along with a generous sample of Minard's all sorts of bird food, together with a real treat for your birds, a small tin of Minard's Bird Treat, a most delicious and strengthening treat for the birds.

Every Bird Lover Should Have This Book

**Acid Stomach**

Excess acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is in a glass which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention.

One spoonful of Phillips' Milk of Magnesia neutralizes instantly many times its volume in acid. It is harmless and tasteless and its action is quick. You will never rely on crude methods, never continue to suffer when you learn how quickly, how pleasantly this premier method acts. Please let it show you—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

HUNTER-MARTIN & CO., REGINA, SASK.

## DISCUSSION ON INSURANCE FOR THE UNEMPLOYED

Ottawa, Ont.—A scheme of unemployment insurance for Canada must of necessity be supported by government subsidies, said Prof. Gilbert R. Jackson, of the University of Toronto, addressing the Canadian Political Science Association in annual session here.

Even in England, Prof. Jackson said, where labor statistics dating back 60 years were available, it had been found necessary to support the scheme by state assistance. It would be almost impossible to carry on unemployment insurance by workers' contributions alone in Canada, where the expectation of employment in future seasons could not be as well charted as in England, even.

The unemployment situation was more acute in Canada than in any other country because of the fluctuations, not only in seasonal employment, but in demand for labor as between the various provinces.

Questions which he contended must be carefully considered before putting such insurance into effect were whether there was sufficient body of public opinion in favor of it, and whether there was danger that the energy of the Canadian workers would be sapped by the system.

Benefits of the scheme would be largely dependent on the character of the scheme of health insurance, and a greatly extended employment placement service.

### No Duty On Foreign Wheat

British Government Is Opposed To Tax Says Minister

London, England.—The question of preference for the Canadian wheat grower in the British market over foreign wheat-growers came up in the House of Commons. Rt. Hon. William Graham, president of the Board of Trade, in reply to the suggestion, said the government did not intend to impose any duties on foreign wheat, so that the question of granting Canada preference did not arise.

The answer brought a spirited query from the Conservative benches. "Do we understand the government's reply to the Canadian tariff concessions is that we can only trust them the same as we trust foreign governments?" Mr. Graham was asked.

"Not necessarily," the cabinet minister replied. "The questioner spoke of a tax on all imported wheat. The government is opposed to this."

### Toronto Man Killed When Parachute Fails

Was Making First Attempt To Jump From Airplane

Toronto, Ont.—Attempting his first parachute jump from an airplane, Kenneth Burgess, Toronto, was killed when the parachute failed to open. The airplane was a Colonial Airways plane, which was flying from Toronto to Winnipeg. The plane was carrying 12 passengers and a pilot. Burgess was the only person in the plane who was not a member of the airline.

Burgess is survived by his widow and two children.

### Special Stamp Issued

Melbourne, Australia.—During a short and intensive campaign to assist the appeal of the prime minister of Australia, Hon. James Scullin, for the growing of more wheat this year, the postal department has issued a special cancellation stamp bearing the words: "Grow More Wheat."

### No Press Men On Dirigible

London, England.—The only press information that will be given respecting the R-100 flight across the Atlantic will be that kept by Wing Commander R. B. B. Colmore, who will release it on the craft's arrival in Canada. On the return trip Canada and British newspapers will be carried.

### Dry Ice Test Shipment

Brandon, Man.—Two cars of eggs of the Manitoba Co-operative Poultry Association were shipped to Montreal under the dry ice test. This meant insulated containers were used in the cars and that circulating carbon dioxide gas preserves the eggs.

W. N. U. 1839

## Ask Amendment Of Criminal Code

Christian Scientists Want Clause Introduced For Their Protection

Toronto, Ont.—A despatch from Ottawa to the Toronto Star, says that in a bill introduced by the government to amend the criminal code, a clause has been made at the request of Christian Scientists. In three sections, which deal with the obligations of heads of families, people in charge of the sick, and masters and mistresses of servants and apprentices under sixteen. It is explained the purpose of the bill is to protect Christian Scientists from prosecution their beliefs without fear of practice.

The new sub-section which is suggested for the criminal code in this regard is as follows:

"Any obligation which may be involved in this or the two preceding sections to supply medical or surgical treatment to a person, or to a person of life, shall not apply to, or affect persons using or depending on prayer or spiritual means for the treatment of human ailments and enjoyment or exercise of religious freedom."

### Suggest Advisory Board

Commission Would Help To Solve Problem Of Immigration

Ottawa, Ont.—Establishment of a commission to study the problem of immigration, on lines similar to the tariff board, was one of the many suggestions dealing with the immigration problem at the annual session of the Canadian Political Science Association here. The suggestion was made in a paper by Prof. W. B. Hurd, of Brandon, Man.

In his opinion the regulation of immigration was a matter for scientific, economic and social study rather than politicians. A commission could make a continuous examination of the economic and social conditions throughout Canada and could give expert advice to the governments on the number and type of immigrants which could profitably be admitted. Persons interested in securing immigrants for any district would have to make application before the commission addressing evidence of an economic rather than a sentimental character.

### Will Arrange Railway

Bay Route To Be Brought Under Crown's Next Agreement

Ottawa, Ont.—A. T. Cramer, Minister of Railways, stated that it is the policy of the Federal Government to enforce Crown's Next Pass rates on the Hudson Bay Railway. The railway will be operated on a year-to-year basis, and Mr. Cramer said that he proposed to take immediate steps to discover what the legal position is. He will consult with the railway company and find out exactly if Crown's Next Pass rates automatically apply to the new route. If not, he will initiate steps to bring the Bay route under the Crown's Next agreement.

### Saskatoon Cadets Vectors

Win Junior Shield In Dominion Rifle Shoot

Ottawa, Ont.—A youthful team of cadets of Nutana Collegiate Institute, Saskatoon, Sask., who are senior shield in the winter cadet shooting indoor series held throughout Canada under the auspices of the Dominion of Canada Rifle Association. A report issued from headquarters of the association shows the Saskatoon cadets compiled a high average of 97.11 out of a possible 100. The Quebec Seminary team won the senior cadet shield with a shooting average of 98.80.

### Germany Contradicts Report

Published here on the Chinese north coalition by way of London, England, that the French authorities of Indochina have intervened to consign to the Nanking government of poison gas, which was clearly intended to be used by the German army, declaring it absurd anti-German propaganda.

### French Troops Leaving Rhineland

Frankfurt-on-the-Main, Germany.—Evacuation of the Rhineland has been started in the final stages of the third zone of occupation. Heavy artillery, pioneer equipment and columns of troops are moving toward France in the final column which will strip the Rhine of French soldiers.

### Nansen's Successor

Olo, Norway.—Prof. H. U. Sverdrup, of Bergen, Norway, has been named to succeed the late Dr. Fridtjof Nansen, explorer, as leader of the proposed Graf Zeppelin Arctic flight.

## Naval Agreement Is Attacked By Admirals

Places Their Navy In Inferior Position Says U.S. Officers

Washington, D.C.—Two more admirals told senate committees that the London naval treaty would leave the United States in a position of inferiority.

Rear Admiral J. V. Chase, of the General Board, said the pact did not represent parity with Great Britain, and had many other flaws from the viewpoint of a navy man.

Although he was an adviser at the London conference, Rear Admiral J. R. P. Friggle said, he was consulted but once by the United States delegation. He advised the delegates against the cruiser arrangement they finally accepted.

## HOUSE UNITED IN ENDORSING PENSIONS BILL

Ottawa, Ont.—The government and the opposition united in expressing appreciation for the work of the parliamentary committee on pensions, when the bill to amend the Pensions Act was before the House of Commons in committee. The bill is to give legislative effect to the recommendations of the pension committee decided upon after a lengthy enquiry into the claims of organizations of returned men for more generous treatment. The bill passed the committee stage quickly, and was then given third reading. It now goes to the senate.

When he arose to explain the bill Hon. Dr. J. H. King, Minister of Pensions and National Health, praised the work of the committee. He felt that not only would the returned men for more generous treatment, but the bill would be a landmark in the history of Canada, be pleased with the work which had been accomplished and highly appreciative of the untiring efforts of the members of the committee. The report of the committee had been unanimous.

The bill revises the machinery for dealing with appeals of soldiers from the pensions board. It provides a veterans bureau to prepare the cases for soldiers. An important change gives a veteran the advantage when a veteran's bureau to prepare the cases for soldiers. An important change gives a veteran the advantage when a veteran's bureau to prepare the cases for soldiers.

Congratulating the committee on the patient consideration and expert knowledge brought to this important question, Hon. B. Bennett said its members were entitled to the thanks of the nation. The committee was composed of men with first hand experience of soldiers' problems. He especially praised the chairman, C. G. Power (Liberal), Quebec, and the persistent problem. They wanted measure of generous compensation to all those who had risked their lives for the nation and who, when they returned home, the country was living for them, said Mr. Bennett.

There was nothing partisan in the bill or in the methods by which the committee had worked.

### Japanese Immigration

Ottawa, Ont.—Two hundred and thirty-four Japanese immigrants have been admitted to Canada since September 1, 1928, up to the end of the last fiscal year, according to a return tabled in the House of Commons.

Of these 120 were males, and the balance females. Fifty-eight were agricultural workers, and 56 were domestic workers. The remainder were children. Only 50 Japanese are permitted to enter Canada annually.

### Jolly Beggars Broadcast Joy

Company, from 8.15 to 9.45, Eastern Daylight Saving Time, on Sunday, May 18.

The following artists took part in the programme: J. Campbell McInnes as "The Narrator" (Robert Burns); Finlay Campbell as "A Maimed Soldier"; John Detweiler as "A Tanker"; Mrs. Dwyne Wynn as "The Widow of a Highland Freebooter"; P. Finlay as "The Soldier's Love"; and J. Campbell as "The Soldier's Love".

## NEW POST LAUREATE

Will Permit English Boys To Attend Canadian Universities

Toronto, Ont.—Sir Robert Falcon Scott, president of the University of Toronto, announces the establishment of a reverse "Rhodes Scholarship" is being considered by a committee of English schoolmasters to permit English boys to attend Canadian universities.

Dr. Cyril Norwood, chairman of the party of English schoolmasters, which recently visited Canada, strongly advocated such an exchange of students, stressing his wish to see English boys specialize in economics and science. In praising the idea, Chancellor H. F. Whistler, of McMaster University, said, "I consider the point by Dr. Norwood, that Canada offers opportunities in the scientific and economic fields is well taken. One would hardly expect English students to study classics here when such excellent facilities are offered at Oxford."

Gen. C. H. Mitchell, dean of the faculty of applied science of the University of Toronto, termed the scheme of "Reverse Scholarships" practical and feasible.

### Wants Public Represented

People Interested In Veterans' Allowance Act Says Major-General MacDonnell

Ottawa, Ont.—Criticism of the plan to appoint the commission to administer the War Veterans Allowance Act wholly of returned men was made by Major-General A. H. MacDonnell, a member of the Senate committee investigating the bill. Dr. J. A. Amyot, Deputy Minister of the Department of Pensions, informed the committee, was the intention to appoint veterans to the committee. General MacDonnell did not contend that returned men could not fill the office, but he believed the general public should be represented as well. County judges could be utilized, he suggested, and they would bring to the committee experience that the majority of returned soldiers lacked.

### Change Will Assist Trade

Canadian Tariff Gives Many Advantages To British Manufacturer

London, England.—Hon. W. R. Smith, parliamentary secretary to the Board of Trade, said in the House of Commons, the changes in the Canadian tariff would affect business operations in a great many respects. Every effort was being made to assist contractors and traders to take advantage of their new opportunities, he said. While the department of overseas trade believed no practical purpose could be served by such a conference it would be glad to adopt the proposals of particular groups if they felt that consultation would be useful, he concluded.

Gen. C. H. Mitchell, dean of the faculty of applied science of the University of Toronto, termed the scheme of "Reverse Scholarships" practical and feasible.

### Conciliation Board To Settle Dispute

Dockers At Vancouver Wish Alterations In Renewal Agreement

Ottawa, Ont.—A labor dispute involving 1,100 water front workers in Vancouver and district is to be settled by a board of conciliation under the Conciliation and Disputes Investigation Act, Hon. Peter Heenan, Minister of Labor, announced. The parties involved are the Shipping Federation of British Columbia and some of the employees who are members of the Vancouver and District Waterfront Workers' Union.

The men wish the renewal of the agreement with the employers covering wages and working conditions which expires November 30, 1929, with certain alterations. Two members of the board of conciliation have been appointed: H. B. Smith, of Vancouver, on the recommendation of the employers, and J. E. Hall on the recommendation of the employers.

Mr. Heenan is awaiting word from these two board members as to the selection of a third member who will act as chairman.

### New Tariff On Fruits Is To Be Amended

Ottawa, Ont.—Amendments will be introduced to a number of items in the tariff resolutions affecting fruits and vegetables, Hon. C. A. B. Macdonald, Minister of Finance, announced in the House of Commons. The changes will apply to products which under the present tariff have no value, as well as specific duties. The specific will be made to apply only in those cases where the value of the imports exceeds the value of the Canadian grown fruit and vegetables.

The announcement of the finance minister was greeted with applause by the Conservatives who expressed the opinion that he had become a convert to the seasonal tariffs they had been advocating.

When the uproar had quieted, Mr. Macdonald explained that the decision to limit the specific duties to certain seasons instead of the entire year had come as a result of conferences with the fruit and vegetable growers. They had expressed willingness to co-operate in this plan. He said he did not promise that the seasons would suit all the growers from the Atlantic to the Pacific because of the many differences as to the dates when such products are marketed here, but an attempt had been made to deal as fairly as possible with all.

The House spent the entire day on budget resolutions, and some progress was recorded. The tea item, as amended by the budget, was finally approved. Under this item tea of the highest quality is to be imported, and is subject to duty of nine cents, intermediate, and ten cents.

Approval was also given to the resolution which declared that excise duties on the use of motor vehicles, estimating the market value of goods for special duty, when these commodities are used in the business, preference, or intermediate tariff. The resolution passed, however, only after protest by certain Conservative members that the Canadian silk industry would suffer through the admission of Japanese silks.

### Radio Stations For North

Two Will Be Added To Network Linking Up Arctic With Rest Of Canada

Ottawa, Ont.—Involving an expenditure of approximately \$67,000, two low power radio stations are to be established by the Dominion Government in the far north, one at Cape Mealy, Coronation Gulf, and the other at Chesterfield Inlet.

The additions to the network stations linking up the Arctic with the rest of Canada have already been approved by order-in-council and the work of installation is to be carried out immediately by the Department of Marine and Fisheries.

The stations are being established in the interest of the influx of prospectors which is anticipated in the district. Both stations are to furnish meteorological reports which will have an important bearing on the successful navigability of the Hudson Bay route.

Small gliders are being offered in England at \$200 each.

## BILL ON LIQUOR CLEARANCES TO STATES PASSED

Ottawa, Ont.—Without a recorded vote, a bill reading "to amend the act relating to the government bill prohibiting the clearance of liquor to the United States," an amendment, moved by Hon. R. T. B. Pope, to the effect that the bill should not come into effect until proclaimed by the governor-in-council, was voted down by a majority of 29 votes. The vote was registered for 10, against 39.

Although several senators spoke against the bill there was no registered vote on the main motion. A clerical error, the substitution of the word "exportation," was corrected in amendment, and thus the bill will be referred back to the commons before becoming law.

Sir George Foster, for years one of Canada's chief temperance workers, was one of the bill's champions. He said that the bill would divert the flow of liquor to Cuba; it might be possible, he admitted, for distillers to subvert the purposes of the prohibition by diverting the export of liquor to St. Pierre and Miquelon.

Mr. Foster announced he would support both the bill and the amendment.

Senator St. Louis reiterated what he said during an earlier debate on the measure, that the passing of the bill would mean a new era in Canadian liquor history.

Canada, however, the country had not yet taken any steps to amend its liquor laws, and it was not until the passing of the bill that the country would be able to perform its duty of good will.

Mr. Heenan is awaiting word from these two board members as to the selection of a third member who will act as chairman.

### New Minister To Canada

Harford MacNider Is Chosen For Position At Ottawa

Washington, D.C.—Hon. C. A. B. Macdonald, Minister of Finance, announced in the United States that he had chosen Harford MacNider as his assistant secretary of war in October, 1928, serving until May, 1929.

Colonel MacNider's career as a business man and financier has been eminently successful. He is president of the First National Investment Company, of Mason City, Vice-president of the First National Bank, and treasurer of North Western States Portland Cement Company.

## The Cause Of Many Ailments

### Heart Trouble May Sometimes Be Traced To Bad Teeth

You may be surprised to know that if you are suffering from rheumatism, pneumonia, tuberculosis, ear trouble, or a number of other common ailments, the fundamental cause of your trouble may be your teeth.

Only in comparatively recent years scientists found this out. And only a comparatively small number of people have learned to take advantage of this new knowledge in keeping themselves well.

The Mayo clinic, which has won fame all over the world for the high standard it maintains, and the conscientious treatment it gives patients, now insists that every person who comes up for treatment should undergo a thorough examination of the mouth, no matter what disease is apparent.

Dr. Charles Mayo once said that the great mass of the people of this generation would not die from one of the great plagues, but that ninety out of a hundred would probably die because of some simple infection, the original cause of which would give them no trouble. Death would frequently be such local infections.

One by one the great agencies of the world are taken over and are being used to what the body and soul need in the work of the system. The life insurance companies want to know what is inside the applicant's mouth before they decide whether or not to issue a good risk for a policy. Large industries employ dentists to examine the teeth of their employees and see to it that they have the best chance of highest efficiency through healthy mouths.

It is therefore, of the highest importance that we be most systematic in taking the very best care possible of our teeth, and it will help us to do so if we know some of the reasons. There is a world of truth in the old quotation, "Infected teeth are ill tenants."

But it is a poor law that fails to work both ways. And while it is true that diseased teeth disturb the system, so also it is true that a system that is not properly fed will bring about tooth-decay. Therefore, if you would have good teeth, it is not sufficient that you keep them clean.

Then there are deathbed wishes when the maker of the will is so flummoxed by those who are in closest touch with him and these will often lead to protracted lawsuits. Have you made your will? If not, do it this week.

If you can't get to town conveniently, write it out in a short form of foolscap or even in a scribbling book, sign it as your last will and testament and one of your neighbors without your signature, and it will have a big expense to your family in lawyers' fees, and the will setting aside the beneficiaries and the right to each will not be carried to a high court to be understood. A signed and witnessed will made on the spot of high noon on the woods held good in a legal test.

And a bad habit, once formed, is hard to break.

An adult who indulges in candies should do so during meal times. Candies or sweets should not be taken between meals, and if this done the mouth should be rinsed out immediately with water. To eat candies just before going to bed is the best way to encourage tooth-decay and large dentists' bills.

If you are visiting the dentist regularly, he will soon detect any symptoms of pyorrhea in your mouth, and the time to treat this disease is in its early stages. To avoid pyorrhea, one must avoid taking soft, starchy and gelatinous foods, like cake, between meals and before going to bed at night. Whenever they are taken they should be followed by cleansers such as fruit. Cleanliness of the mouth is one of the greatest means of avoiding this disease. Thorough mastication helps by increasing the circulation in the gums. If you have erred in the matter of diet in the past, the best thing you can do to correct your mistake is to maintain the habit of brushing the gums and teeth after each meal.

### Would Save Much Trouble

Considerable Expense Is Avoided If People Make Their Will

An Ontario judge recently stated in his country in this province, and he thinks it a fair average in conclusion with the estates of deceased persons dealt with by court officials, only one in every three persons makes a will. The reason assigned for this is that it is repugnant to the average man to think of his own death, he is loath to make his will on a sickbed as it would be an admission that he expected to die. He is always looking forward to the time when he will be better off and doesn't know just how he should dispose of his property. The chief reason to our way of thinking is the old one of procrastination. The making of a will is something men and women don't have to do, like meeting a tax bill, but they put off until they consider it unnecessary until it is too late, and impose a big expense on their heirs by making no will at all.

Some of the shrewdest business men make no wills, and some of them make wills that high court judges have difficulty in interpreting.

Then there are deathbed wishes when the maker of the will is so flummoxed by those who are in closest touch with him and these will often lead to protracted lawsuits. Have you made your will? If not, do it this week.

If you can't get to town conveniently, write it out in a short form of foolscap or even in a scribbling book, sign it as your last will and testament and one of your neighbors without your signature, and it will have a big expense to your family in lawyers' fees, and the will setting aside the beneficiaries and the right to each will not be carried to a high court to be understood. A signed and witnessed will made on the spot of high noon on the woods held good in a legal test.

### More Sweet Clover

Planted In West Area Seeded Is Being Increased In Manitoba and Saskatchewan

From the Dominion Seed Branch comes one of the most interesting reports of field crop development in 1930, which is that the prairie provinces are sowing very much larger quantities of sweet clover seed this year than ever before. The Branch reports indicate a definite trend in the direction of increasing the proportion of forage crops throughout the West, and the best sugar manufacturers are distributing sweet clover seed to test growers for the purpose of maintaining and improving beet production. Saskatchewan is calling for larger quantities of sweet clover seed, which will probably be supplied from Eastern Canada, and Manitoba is also increasing the area of sweet clover seed. A crop of sweet clover costs less to produce than some of the other legumes, it is a practically sure crop, it has very high fertilizer value, and it can be introduced into a system of grain farming with particular ease. These are all factors which contribute to its growing popularity as a crop.

As Ordinary Citizen King George, were he an ordinary citizen, would be "Mr. George Windsor." In similar circumstances, King Edward would have been "Mr. Albert Edward Wattin," and Queen Victoria would have been "Miss Guelph." The family name of the House of Hanover to which Queen Victoria and her predecessors belonged, was "Guelph."

Motor cars hit 260 trains last year, but, you'll notice, the trains are still running.

## NATIONAL HOCKEY LEAGUE PRESIDENT

Frank Calder, president of the National Hockey League, was in the chair at the annual meeting of that organization, which was held at Toronto, Mr. Calder has been the leader of professional hockey in Canada for many years and of international hockey since the scope of the N.H.L. was enlarged. He is a first-class executive officer and the best hockey man in America today.

Every Locomotive Has History Card On Which Record Is Kept

Locomotives, like horses, have to be stable. When the engine has made its journey it is sent to the locomotive shed and refreshed and comforted for its next journey. At the locomotive shed the resting engine ceases to do any work. After having its coal-box cleaned of ashes the driver and fireman hand it over to the shed staff, and then the whole fabric is carefully examined and cleaned and oiled so that no defect is likely to cause examination. After running a thousand miles an express engine undergoes a special examination and overhauling, which includes the washing of the boiler and scouring of the steam tubes. Even more severe examinations follow after every 5,000 miles, after every 10,000 miles, and after every 20,000 miles. After running 30,000 miles the engine goes to the central works to be completely reconstructed. Every locomotive is provided with a history card, in which each repair or replacement is carefully recorded. An engine has to be repaired as in perfect working order before it goes out for a fresh trip, but even this does not absolve the driver from culpability. He has to satisfy himself that there are proper supplies of fuel and water aboard, and that all the working parts of the engine are properly lubricated, before he begins a journey.

### Require Much Care

Over Forty Million Copies Were Published Last Year

More than forty million Bibles were sold last year—a record. The figure surpasses all previous records by 5,000,000 copies.

The British and Foreign Bible Society, of London, England, whose report for 1929 will shortly be issued, sold 12,000,000 copies of the Testaments and the Gospels.

The sales of the National Bible Society, of Bradford, accounted for another five million copies, while the American Bible Society claims a total of 15,000,000 copies of the Bible compared with 11,000,000 in the previous year.

The 12,000,000 turnover of the British and Foreign Bible Society includes 5,000,000 copies of the whole or major part of the Old and New Testaments printed in English. This is an increase of 775,000 in the 1928 figures. A million of these were sold in England. The remainder went to the Dominions and Colonies.

The *Letter for Wales* is still more remarkable. Sixty-six thousand copies of the Scriptures in Welsh were sold in that year. That is 40,000 more than in 1928.

The society publishes the whole Bible or parts of it in 639 languages.

### Mankind's Most Fears

"If we can abolish the fear of unemployment and the fear of war, we will be abolishing the two great fears which afflict mankind," declared Hon. J. E. Fenton, Minister of Trade and Customs, in the Australian Government, speaking at the annual banquet of the Quebec division of the Canadian Manufacturers' Association, Montreal, Mr. Fenton was on his way home from the naval parity.

Services Are Voluntary

Thousands of voluntary observers throughout North America are collecting information concerning the numbers of water-fowl observed on specific days each month. Reports for Canada are forwarded to the National Parks of Canada, Department of the Interior, Ottawa, and those for the United States to the Biological Survey, Washington, D.C.

Island Well Named

Niaouf Island, in the South Pacific, from which astronomers will observe a total eclipse of the sun next October, is known as "Tinian Island" because mail for its inhabitants is sealed in a tin can and thrown overboard by the monthly inter-island steamer, a native swimming out and rescuing it.

### CAPTAIN J. MCCANNELL GETS THE HIGH HAT

Meaning Of Names Seems To Be Carried Out In Works

The names of musical composers are often as suggestive of their work as are those of people in other spheres of life. Handel means commerce or business, and there never was a more businesslike composer than the giant Saxon. Haydn had a name which means "of the moors" or "of the healthy," which may account for the fresh, healthy character of his music. Brahms is nearly the same, but harder and more northern, for the name means nothing more or less than broom, a plant which grows in abundance in the district from which the Hamburg composer came. One might ask whether the flowing character of the music of Bach does not come from his name, which means brook or river, brightness of that of Verdi (Green), or the driving style of Wagner (Cartwright), while Beethoven, and many other names carry equally obvious suggestions.

Canada In World Court

Senator Raoul Dandaneau, Canadian delegate to the council of the League of Nations, announced to the council that Canada would shortly deposit with the league the instruments ratifying the protocol by which the status of the world court of international justice are revised in connection with Canada's entry into the world court. The Canadian parliament recently passed the ratification.

Alcohol Is Being Used Extensively as a Motor Fuel in the Philippines.

## Demand For Land Continues

Largest Number Of Entries This Year Made Near Prince Albert

The demand for quarter sections each of 160 acres, of free homestead lands in Western Canada, which are given by the Canadian Government to settlers, continues to increase. In the first three months of this year there were 2,648 entries registered representing 412,420 acres compared with 2,405 entries representing 364,500 acres in the corresponding three months last year. Of this year's entries 108 were in Manitoba, 929 in Saskatchewan, 1,420 in Alberta, and 107 in the Railway Belt and Peace River Block, British Columbia. The largest number of entries were made by the Prince Albert, Saskatchewan, district, a total of 106. The Edmonton, Alberta, district, was second with 277 and the Peace River district third with 115.

The Canadian Government requires a registration fee of \$10 to be paid by each settler to whom a quarter section of homestead land is granted, and the settler must do a certain amount of cultivation and fulfil other requirements as to residence, etc., within three years. These homestead lands are now for the most part taken from railways but will be the rapid advance of settlement and good roads they are in increasing demand.

## Production Of Timothy Seed

Experiments Show Broadest Method Of Seeding Is Best

Timothy is one of the most universally grown hay crops in Canada, and consequently a considerable quantity of the seed of this crop is required each year, and it is usually in fairly good demand.

In a recent examination Experimental Station, Kapuskasing, Ontario, an experiment has been conducted over a period of years, with the object of comparing the results in yield and quality of seed produced from seeding broadcast, in combination with red clover, with seeding alone, in rows 12 inches apart, and in rows 24 inches apart.

The plot seeded with a mixture of timothy and red clover is cut for hay the first year and saved for seed the second, the idea being that the red clover will have largely died by the time the timothy stand would be mostly timothy.

This experiment has been conducted in quadruplicate one-fourth-acre plots, using a nurse-crop of either barley or oats.

It has been found that the first-year meadow has not been a good stand and in some cases had to be cancelled. This was probably due, in part at least, to the smothering effect of the nurse-crop.

The average results show that seeding alone is not a very great difference between seeding broadcast and in rows, and considering the fact that fields sown in rows are more apt to become weedy unless the nurse-crop is used, which would take extra time and naturally add to the cost of production, it would appear as though the broadcast method is to be preferred.

## How Name "Rocky Mountains" Originated

Indians Referred To Them As Great Wall Of Rock

In his diary, what Governor of York Factory, on Hudson Bay, in 1684, the first English explorer to note the name of the mountains of a band of "Mountain Indians" with whom he had "a great deal of discourse." They told him their country was called "the mountains and the mountains," so they cannot see the tops without they be clear weather. The sea lies but a little way to the westward of the mountains. This is the earliest reference to the Rocky Mountains in the records of the Geographic Board of Canada.

In 1720 Beauchamp, the French Governor of the Canadian province of Quebec, which the Indian, Ochagoch, had drawn for La Verendrye, western Canada, had a Portage route to the Hudson River from Lake Superior, which map indicates the "montagnes de Pierre Brillantes," a name which is found in the "Journal of the Honorable Bright Stiles" on Jonathan Carver's map, 1778.

The mountains are referred to by the French name in Legardeur St. Pierre's Journal of 1752. He calls them "montagnes de Roche." The name of the mountains in the name which in Cree is "assininawit," in Stoney "nahah," and in Blackfoot "mistakik." Viewed from the prairies, the rocks present a great wall of rock.

## Composers Well Named

Meaning Of Names Seems To Be Carried Out In Works

The names of musical composers are often as suggestive of their work as are those of people in other spheres of life. Handel means commerce or business, and there never was a more businesslike composer than the giant Saxon. Haydn had a name which means "of the moors" or "of the healthy," which may account for the fresh, healthy character of his music. Brahms is nearly the same, but harder and more northern, for the name means nothing more or less than broom, a plant which grows in abundance in the district from which the Hamburg composer came. One might ask whether the flowing character of the music of Bach does not come from his name, which means brook or river, brightness of that of Verdi (Green), or the driving style of Wagner (Cartwright), while Beethoven, and many other names carry equally obvious suggestions.

Canada In World Court

Senator Raoul Dandaneau, Canadian delegate to the council of the League of Nations, announced to the council that Canada would shortly deposit with the league the instruments ratifying the protocol by which the status of the world court of international justice are revised in connection with Canada's entry into the world court. The Canadian parliament recently passed the ratification.

Alcohol Is Being Used Extensively as a Motor Fuel in the Philippines.

## Britain Leads In Luxurious Flying

New Lines Of Imperial Airways Are Last Word In Luxury

Julius Briet flew over the English Channel just twenty-one years ago next July, in a contraption of wood and little better than the gliders which are now coming into vogue. By the time the exact anniversary comes around, Mr. Briet will be able to gaze upon real liners of the air which are the real descendants of the machine he navigated on that occasion.

British Imperial Airways are putting into commission in a few weeks a fleet of air liners between London, Paris and other cities, which are as far in advance of the Briet machine as the Bremen is ahead of the packets which brought our forefathers to this country a century ago.

They will carry forty passengers, plus two pilots and two stewards. There will be two cabins, one of them for smokers, but each as commodious as the drawing-room of an average liner, being sixteen and a half feet long and thirty feet wide. The cabins are decorated on a scale never hitherto attempted except the most expensive and exclusive trade. There will be a buffet and bar cabin liners built for the Atlantic between the two cabins, and tables are provided for each.

This, of course, is an all-British achievement, the air liners being built by the Handley-Page Company. Undoubtedly it will be as easy for these air liners to travel between London and Bagdad, as between London and Paris, with the necessary stops between.

The big Dornier machines have carried more passengers—150 at a time—but that, of course, is not possible by the use of British-built engines of the same type as the Airspeeds.

Thus Britain is again leading the way in the new science of transportation. The fastest and biggest planes, the fastest and most luxurious trains, and ocean steamships which are temporarily the second fastest in the world, are all built and manned by Britons. In the air, on the land, and on the sea, British is best.

## Advice From One Who Knows

Immigrant Who Has Prospered Says Newcomer Must Take Job

Less than four years ago, Thomas Nicholson arrived in Montreal from England, after several weeks of aimless wandering about he found himself without money and disillusioned. He applied to the Protestant Employment Bureau for aid, and following a series of events, he returned to the office of his benefactors, in good health, prosperous and enjoying a good position in the West. He is returning from a visit to England.

The man who wants to make good in Canada must be prepared to accept whatever is offered and must at all events fit himself into his new sphere of life. He is enabled to elevate his position," Mr. Nicholson declared. He found during the first months of his stay in Canada, that he would have to accept labor employment. He did so, saved up and went to the harvest fields, where he again found that the money which enabled him to reach Vancouver, after several weeks of hard work, he rose rapidly to his present position as assistant manager of a divisional plant.

## Had First Choice

The doctor of a country village had two children who were acknowledged by the inhabitants as being the prettiest little girls in the district.

"While the two children were out walking one day, they happened to pass quite near two small boys; one lived in the village and the other was a stranger."

"I say," said the latter to his friend, "who are those little girls?"

"They are the doctor's children," replied the village boy. "He always keeps the best for himself."

"I have to wait to a place ten miles from here."

"Can you help you?"

"No, you a car?"

"No, but I will walk with you and that will only make 5 miles each to walk."—Pages Gales, Verdun.

"Go home and go to bed."

"I dare not."

"Why not?"

"Last night I dreamt of work!"—Nagie Lottige Wad, Berlin.

# Canadians Have Much To Learn About Vast Empire Being Developed In North

So vast is the Canadian heritage and so numerous are the points of interest, promise of great and continuous development, that it is difficult for the most assiduous of newspaper readers to keep in touch even with his own province. For the most part, information is dependent on newspaper reports and there are all the more reason to appreciate editorial and other articles outlining what is being done in districts that are only in process of being opened to the light of day. Recently the *Leibniz Herald* touched on the development of the Alberta Northland and remarked that as this is proceeding so that the Columbia's great block of land east of the Rockies is coming in for a lot of attention. Speaking recently about the potentialities of this region it quoted Hon. P. P. Burden, Minister of Lands of that province, as saying that the section had been one of the best bodies of coal on the continent, and according to coal authorities it was the only coal on the continent that would smelt with the best results.

In close proximity, Mr. Burden said, was a great body of iron ore. In years to come, he believed, a great steel and iron industry would be developed and would create a big demand for the agricultural products of the district.

There were also other minerals, the minister said, and possible hydro-development at low cost.

The Herald reports in view previously expressed that in the vicinity of the head waters of the Peace River, and where they cut through the backbones of the continent, the way to the Arctic, there is a veritable empire of wealth such as few Canadians even dream of. Here are to be found valuable commercial timber and pulpwood. The Groundhog coalfields in which the late Lord Rhodes was interested lie in that area. Close by there are said to be mountains of iron, while it is also stated that mines as rich as the Sullivan at Kimberley may be developed. And with it all there is, in the Peace River Canyon, water power capable of developing with the Peace River something like 1,500,000 horsepower.

While there is so much talk of a coal outlet for the Peace River country, it is well to bear in mind that the development of the mining, lumbering, pulpwood and hydro-power potentialities along the Peace River head waters, is practically certain to open up a route through the northern section of British Columbia. Somewhere along the course of that route will be a railway, and situated upon it, close to the Pacific, and closer to the Orient than any other British Columbia city, will be a modern city founded upon the wealth of resources in that area.

We really know very little as yet, the Herald says truly, about the great northern which, in a few years will be pouring its treasure into the world's markets and bringing back new wealth to Western Canada.

## Settlers Are Keeping Ahead Of Railway

District In Northern Saskatchewan Rapidly Filling Up

Settlers are still keeping far in advance of the railway in the opening of the north.

For the past 10 or 12 years good crops have been grown on the Meadow Lake district, 100 miles north of North Battleford, and the growers have hauled their grain 60 miles to the nearest railway line.

This year the Canadian Pacific Railway is building a line through the Meadow Lake district, and Meadow Lake is no longer the frontier town. Every week hay-racks containing settlers' effects are to be seen ferrying the Beaver River, 20 miles north, making for a district on the other side which is rapidly filling up.

## Britain Acclaims Canadian Wheat

Sir James Dunn Says Manitoba Product Makes Best Bread

All who are interested in Empire Free Trade should make it their duty to demand an "Empire Loaf" made of wheat flour produced in the British Empire—and popularize it among their friends, says Sir James Dunn, in a letter to the *London Evening Standard*.

Sir James, a native of Balbrunn, New Brunswick, and now a prominent lawyer and husband of the Marchioness of Queensbury, says that apart from any question of imperial sentiment, the Empire loaf consisting of 85 per cent. Manitoba wheat, is the best bread in the world. His own researches into the relative nutritive values of Canadian and competitive wheats have shown the Manitoba wheat produces a bigger and lighter loaf, which gives greater nourishment than bread made from any other flour, he says.

(By Annabelle Worthington)

3279

Ideal interpretation of wrap-around drapes and side ties combines with the supple bodice that fastens at hip with buckle, to give the figure graceful length. The normal waistline is indicated by seaming which makes the tight through the hips and moulded line of bodice more prominent. The neckline with supple yoke is unusually becoming fashion.

Style No. 3279 is distinctly smart in novelty silk and wool crepe in dark plum tones. The shawl collar is of plain fallie crepe in blending blue, while the vest chosen white plique.

It is designed in sizes 16, 18 years, 36, 38, 40 and 42 inches bust. It's a model that makes up most attractive in crepe satin. The two surfaces can be nicely worked together in dark blue. The dark brown shade is especially popular. Black silk crepe with eggshell vest is chic for all-day occasions and is a favorite with smart women.

Pattern priced at \$1.00. Be sure to fill in size of pattern. Address Pattern Department.

## Rice Growers To Compete

B-High World May Have Exhibit At World Grain Show

In all probability rice growers from British Guiana will be represented in the competitive classes at the World's Grain Show office. A letter received at the exhibition office, Regina, from J. Sydney Dash, director of the Department of Agriculture, Georgetown, British Guiana, The compliers of the prize list for the 1932 World's Grain Exhibition designed to make it as attractive as possible to the growers of all countries. For this reason, apart from the fact that the much smaller offerings are higher than have been offered ever before, the classification embraces practically all of the grain and seed crops cultivated the world over.

The rice growers of British Guiana, one of the smaller parts of the British Empire located in the tropical regions of northern South America, are showing a keen interest, and according to word received from the World Grain Show office from Mr. Dash, exhibitors of rice may be expected to make their country. In competing with the other rice growers, he has this collection of rice to take part in your exhibition and conference to be held in 1932. I shall advise it to the rice growers who have the opportunity to participate."

## For Healthy Poultry

Clean Soil In Run Necessary For Growing Chickens

Clean soil in the run is the one sure cure and preventive of the most destructive poultry disease, intestinal parasites, asserts the Poultry Husbandman of the Dominion Department of Agriculture. And practicing what he preaches, the poultry runs at the Central Experimental Farm have been free from plagues and the rotation system of soil cleaning is under way on the runs used last year. A succession of hoed, grain and green crops is used to remove all possible infection from intestinal parasites. Poultry should always be kept on clean soil, especially growing chicks, and crop rotation on the poultry run is the one most effective way of enabling nature to do the trick.

## Increase In Plant Imports

Canada Bringing In Large Number For Parks and Gardens

Canada's appreciation of the aesthetic in parks, garden and amateur horticulture is reflected in the amazing increase which is reported in the importations of trees, shrubs, roots, perennials and bulbs. In 1919 the Dominion Department of Agriculture examined 50,000 plants, etc., at ports of entry, while in 1929 the number examined was over 45,000,000. Inspection stations are maintained at Halifax, St. John, Quebec City, Montreal, Ottawa, Toronto, Niagara Falls, Windsor, Winnipeg, Edmonton and Vancouver, where imported plants are examined to ensure freedom from insect pests and plant diseases.

## Curious Custom In Ceylon

At a funeral recently of a native near Colombo, Ceylon, friends brought many gifts to the corpse. Each had something different, including cooked meat, fruit and liquors. As the coffin was conveyed to the burial place on a huge pig and while structure resembling an ox cart, the gift-bearers accompanied it in solemn procession.

## R. S. McLaughlin

President of General Motors of Canada, Limited, and one of the outstanding industrial figures of the Dominion, who was added to the board of directors of the Canadian Pacific Railway Company at the annual meeting of shareholders held early in May, Mr. McLaughlin is also vice-president of the General Motors of Canada, Limited.

He graduated from the University of Minnesota, and was a Rhodes scholar. Paying tribute to him, Dr. R. C. Wallace, president of the University, said: "He has established his position in a very notable way with the students of history in the University, and his books and other contributions to the field of history have given him a place in the world of accurate scholarship." Prof. Burth's "The Romance of Western Canada" was published this year.

## University Is Loser

Alberta Regrets Removal Of Professor A. L. Burth To Minnesota

Anyone who went through the classes of Prof. A. L. Burth of the University of Alberta, or heard him speak in public, will regret to hear that he is going to the University of Minnesota. For seventeen years, except for a period of war service, Dr. Burth has been at Alberta. He graduated from the University, and was a Rhodes scholar. Paying tribute to him, Dr. R. C. Wallace, president of the University, said: "He has established his position in a very notable way with the students of history in the University, and his books and other contributions to the field of history have given him a place in the world of accurate scholarship." Prof. Burth's "The Romance of Western Canada" was published this year.

## Government Farms Are Busy

Extensive Research Carried Out By Dominion Department Of Agriculture

An appreciation of the range and extent of applied agricultural research carried out by the Experimental farms and stations of the Dominion Department of Agriculture throughout Canada is afforded by the report of the Director, Dr. E. S. Archibald. At the time the report was prepared there were 2,453 active experimental projects in operation, ranging in application from "Agronomy" to "Toxicology." Horticulture heads the list with a total of 611 active experimental projects; then in order come animal husbandry, 421; botany, 295; field husbandry, 282; poultry husbandry, 168; arboriculture, 149; cereals, 124; chemistry, 103; illustration, 76; toxicology, 66; bees, 63, and pathology, 23.

## A Misunderstanding

"Surely, John, you haven't brought any one home to dinner?"

"Sure I have. Haven't you got anything for them?"

"Why, no, you told me you'd bring home a couple of lobsters for dinner."

"So I have. They're waiting in the parlor."

## High-Class Poultry and Eggs

# Department of Agriculture Is Studying Problems of The Ranching Industry

The following article was prepared at the direction of Dr. J. H. Goss, Deputy Minister of Agriculture, by Mr. E. S. Archibald, director, Dominion Experimental Farms, Ottawa.

Previously to 1912, when the beef cattle industry in Canada was in a thriving condition, a very small investment, outside of that in cattle, was necessary to carry on the business. With the coming of the settler, and the consequent splitting up of the open range, the rancher was confined to a definite area. This change necessitated a more economical use of the range and the construction of fences, the development of watering places, and the production of winter feed. With these increased costs, more attention was paid to the class of cattle raised, the percentage calf crop, and the death losses. Although the best known grazing practices were followed there was a decline in the carrying capacity of the ranges, and many areas became badly overgrazed. The result was depleted pasture, less thrifty cattle entering the market and sub-normal gains in weight by marketable and breeding cattle.

It was not until 1925 that a demonstration of the experimental work on the range, and following a survey in 1926, by the Dominion Experimental Farms, Department of Agriculture, was decided to conduct extensive experiments on the short grass plains to study methods of range management, with the object of improving the carrying capacity. As the outright purchase and equipping of an experimental ranch appeared to be unwise because of the large cost involved, it was decided that it would be more economical and more useful to cooperate with some rancher who had a long experience in ranching. Gilchrist Brothers, of Medicine Hat, Alberta, offered their co-operation, which was accepted and the experiments are now being carried out on this ranch.

The main problem under investigation is known as the deferred and rotation system of grazing. It is usually carried out on three pastures, depending upon the conditions under which it is practised. The system is designed to defer grazing on each pasture for six to eight years, and to determine the practicability of the scheme. The fourth field is grazed continuously and serves as a check on the other fields. In order to determine the efficiency of this system of grazing as a whole and whether or not the deferred and rotation system is a thorough study of all factors affecting it is made.

An essential factor in range management is a reliable water supply. In this connection the development of natural watering facilities is being investigated. Other factors in range management being studied include the use of salt, the gains in weight by different classes of cattle, the possible influence of the grazing on the palatability and nutritive value of the range vegetation, the question of deterioration in the feeding value of hay kept several years in reserve, and the effect of frequent cutting on range hay production. As fencing occupies an important place in the ranch operations, the use of wood preservatives for the posts and cost of construction and maintenance are also being investigated.

In addition to the projects at the range station there are several other investigations being conducted in Alberta, Saskatchewan, and British Columbia, including an economic study of the vegetation, reseeded and burnt-over land, and a number of trials in the growing of forage crops for winter feeding. A beginning has been made of a reliable study of the production of range cattle in the different grazing areas, the object being, first, to learn the financial importance of different factors in the cattle business; secondly, to present a fair picture of the industry, and thirdly, to analyze the business for the purpose of learning which are the most profitable range practices to follow in the different locations.

New projects to be studied during 1930 will be the determination of the carrying capacity of the range land, the effect of short grass plains, the winter feeding of cattle, the use of home-grown roughages and their economic value for fattening younger stock to maturity, and the value of supplemental feeding to cows on winter range.

When more complete information is available on summer grazing, winter feeding, and on cost of production, a fairly complete knowledge of

all phases of the cattle industry will be available.

## Might Increase Apple Sales

Vending Machine Opens New Market For Canadian Product

One of the most interesting and important developments in connection with the marketing of apples in recent years is the automatic vending machine. Officials of the Fruit Branch of the Dominion Department of Agriculture are watching this development with special interest at the present time and Commissioner G. E. McIntosh states: "I think it will provide a new means of marketing apples which will prove at once popular and effective."

The new machines, which there are two types on the market at the present time, have been tried out with surprisingly satisfactory results on a number of occasions. At the Royal Winter Fair, Toronto, last year, several of these machines were in operation and the sales for each machine ranged from 3,000 to 7,000 apples per day.

The automatic apple vending is a "nickel-in-the-slot" contrivance in which the customer may select the apple he prefers from a range of sizes, variety and color. Both the wall and cylinder type machine carry the apples in trays with glass tops so that they are easily visible. The apples are kept in perfect condition through the use of dry ice, and the automatic vending provides the individual an opportunity to get "an apple a day," or what is more important, an apple when it is wanted.

An idea of the potential sales value of these machines in operation is afforded by the experience at the Royal Winter Fair. The machines there in the week they were in operation averaged sales of 2,500 boxes of fancy fruit of an average size of 125 apples to the box; at 5¢ apiece this meant \$62.50 a box or well over \$15,000 from the machine sales during the season.

British Columbia has taken the lead in the introduction of the sale of apples by this type of appliance: the Dominion Department of Agriculture has put one in operation in the City of Vancouver and many more are being installed in Victoria.

## Sweden Is Prosperous

Has Small Population But Is Very Progressive

Sweden, which has a population less than that of London, is one of the most prosperous of European countries. Though only a third of the small population lives in towns, Sweden is remarkably good ahead in all matters of art—the drama, architecture, and so on. The Town Hall of Stockholm is one of the finest modern buildings in the world. There was a time when Sweden made a great stir in the affairs of Europe. Other factors in range management being studied include the use of salt, the gains in weight by different classes of cattle, the possible influence of the grazing on the palatability and nutritive value of the range vegetation, the question of deterioration in the feeding value of hay kept several years in reserve, and the effect of frequent cutting on range hay production. As fencing occupies an important place in the ranch operations, the use of wood preservatives for the posts and cost of construction and maintenance are also being investigated.

Woman claims equal rights with man in Japan as a pearl diver. Before the Jap girl is 15 she knows all about diving and is used to bringing up oysters from depths of more than 25 fathoms.

Jinks—"Have you ever lost your temper before your wife?"

"Yes, because she beats me to it every time."

"It is the master! But where is his car?"

"Did he have his car with him? We wouldn't say he kept asking us to shut the window as we dragged him home!"—Flegendat Blatter, Munich

Blk: "I am so glad to meet somebody where shall I find a hairdresser?"—Lustige Sachse, Leipzig.

### CHAPTER XIV.—Continued

A year before there had been talk of building a main schoolhouse in the center of the town; but the plan had been abandoned because so many of the children came from farms outside the village that it would have been necessary to send a bus to collect them, and the old way seemed easier. This chairman began her duties as teacher in the very room where she began her school days nineteen years before. The small, brick building was unchanged save for an impressive sign over the door which read "Lincoln School." This replaced the battered, weatherboard board that had designated "District Four," and was a concession to the darling souls who declared that district schools had "gone out of fashion," and that Winkfield would be a laughing-stock to the entire country unless some change in its educational system was made.

"You'd think to hear 'em talk," raged Deacon Purdie, who always flared into speech at any mention of spending money, either by the town, himself, or one of his neighbors. "That we folks that went to the old schools ain't educated! I guess what was good enough for us is good enough for the smart Alecks that folks is raising these days. I caught Edridge boy making a—just a graceful—er—gesture at me the other day!"

"If he'd caught all the people who would enjoy doing the same thing," grinned Jimmy Bennett when Grandma related this piece of gossip, "they'd reach from here to the district school that he's so keen about! The darned old hypocrite!"

But this time the deacon's faction had triumphed.

"If it hadn't," said Grandma regretfully when Chairman told her that the coveted "job" was landed, "it would be a sight easier for your child. You'd have to start the coldest part of the day to walk that distance. It makes me shiver just to think about it. I wish Ed had made to walk it for you. He'd soon change his mind about whether young folks deserve a better school building!"

"Now don't begin worrying about next winter," laughed Chairman. "I dare say the exercise will do me good. I don't get half enough as it is now."

It was the first of August when Chairman was notified of her appointment. Other events followed quickly on its heels, the most aston-

ishing of all being the Sunday morning when Deacon Purdie surprised the congregation by walking proudly into church followed by the blushing Luella (wearing the much-talked-of yellow beads) and her little olive-brown friend.

"I feel sort of responsible, chuckled Gam Garfield, who had stopped in after service to talk the matter over with Grandma Davis. He laid it on so thick about the cost of settling the thing by law, that I guess he'd decided it would be cheaper to get hitched. Anyway, they went over to Estabroth yesterday afternoon and tied the knot. I haven't heard what bribe he used to make Luella change her mind, but she was smiling enough this morning to please any one."

"He might at least have given the wedding fee to Mr. Merry," complained Grandma. "What was the idea of going clear to Estabroth?"

"Search me!" replied the little lawyer, throwing out his hands in an expressive gesture. "Maybe Mr. Merry formed all the last two ceremonies, and the brides up and died on him, as Lizzie Baker says. Anyway, Grandma, that let you out of any trouble. Now that he's nothing to gain by it the deacon will never let it be known that you got the better of him in a deal."

Grandma glanced as she glanced from the window.

"Here they come now!" she exclaimed excitedly. "They must have come to meet me long way 'round, for I've been here every minute since breakfast and never laid eyes on 'em before. It looks sort of like a bridal procession, Gam, with all those children trailing after. My stars! I should think even Luella Moore (and she's a fool if ever there was one), would know better than to give her babies to such a stepfather. I pity the poor little things; but I suppose their mother is counting on Edgards joining his other wives in Kingston Come, seeing he's so much older, and then she'll come into the Purdie property. Just look at how Edgar struts! He did the same when he married Emma Dodd, but with Carrie and Eva he was sort of drooping, they not being so handsome as his first. I don't suppose you know if Luella got to have a new dress, Gamalot?"

"The lawyer shook his head. "That's beyond me, but here comes Chairman and the doctor. Perhaps they can supply the missing details."

He arose as the girl and her companion entered, and added triumphantly: "I beat you to it, Chairman! I jumped out as fast as I could and made a home run with the news. We've just been watching the bride party from the window."

"Doesn't it beat all?" cried Grandma. "Did Luella have on a new dress, dearie? It looked to me like her old blue made over."

"I can't say," laughed Chairman. "I was far too thrilled watching the bridegroom to have any eyes left for Luella's reindeer! The children gipped over into the Merry's paw, Grandma, but they behaved well."

"I saw their new gowns give one of 'em a dirty look when she dropped a hymn book," proclaimed another arrival who proved to be Jim Bennett.

"I got that, too," declared John Carter. "Wonder if any one in church can remember the text?" he added with a quiet laugh. "The center of attraction was certainly not the minister."

"Well," said the old lady, "I've no doubt that Mr. Merry understood and made allowances. Probably he had considerable trouble keeping his own mind on the sermon. Mr. Merry is a real human if he is a minister. Did you know if Luella had a new dress, Jimmy? I'd admire to find out."

"Mother said it was an old one, fixed up," replied Jim glibly. "Guess Edgards sprung the economy on us. I love so suddenly (considering their recent quarrel), that she didn't have time to visit her modiste."

Chairman giggled, while the doctor reproved her by saying: "I'm shocked at your levity, Miss Davis. This is a serious matter—to Luella."

"I'll say it isn't," said Jim; and added, with a glance at the lawyer, "and it's cost you a good case, Gam. I'm surprised you should let such an opportunity slip through your fingers."

"It was a sacrifice on my part," replied Gamalot, sighing. "I did it, Jim, to save an old friend from getting into trouble."

"He's joking," nodded the old lady. "But there's a sight o' truth behind the joke. You'll get your reward in the next world, Gam, if you don't here. He's referring to a business transaction I had with the deacon, Jimmy," she explained. "I presume Chairman told you about it at the time."

"She did," grinned Jim. "My sole regret is that I wasn't behind the door with these precious ex-droppers."

"Same here," asserted the lawyer, "and I'm glad to give you the privilege of a front seat. Well, Grandma, I must run along or late to dinner. Ah! well that ends well as long as Luella thinks she's adorning her beauty with some costly product of the Orient, why no harm's done. You're going my way, Jim? I'll give you a lift."

"You're a dandy matchmaker, Grandma," remarked John Carter, as the chairs departed and he took the chair beside her.

"Matchmaker!" echoed Grandma indignantly. "If I thought I'd had anything to do with giving those Moore children such a mean stepfather, I'd never rest easy in my grave. There goes George K. and Selma. Things she's adorning her beauty with some costly product of the Orient, why no harm's done. You're going my way, Jim? I'll give you a lift."

"You're a dandy matchmaker, Grandma," remarked John Carter, as the chairs departed and he took the chair beside her.

There goes George K. and Selma. Things she's adorning her beauty with some costly product of the Orient, why no harm's done. You're going my way, Jim? I'll give you a lift."

"You're a dandy matchmaker, Grandma," remarked John Carter, as the chairs departed and he took the chair beside her.

"Matchmaker!" echoed Grandma indignantly. "If I thought I'd had anything to do with giving those Moore children such a mean stepfather, I'd never rest easy in my grave. There goes George K. and Selma. Things she's adorning her beauty with some costly product of the Orient, why no harm's done. You're going my way, Jim? I'll give you a lift."

"Of course she did," said Grandma seriously, though her lips twitched. "Don't grieve so, Chairman. You'll hurt the doctor's feelings. Is dinner ready? I feel hungry after so much excitement! And I presume Lizzie Baker'll be over soon as she eats."

(To Be Continued.)

### THE REASON WHY

#### Thin Baby Children Need Baby's Own Tablets

Malnutrition or inability to derive nourishment from food, is a common cause of thin children and is entirely due to stomach and bowel trouble. Another cause of loss of flesh and sleep is worms.

To correct stomach and bowel troubles and thus insure constipation and indigestion, break up colds and coughs, and relieve the pain and allay the pain which accompanies the cutting of teeth in what Baby's Own Tablets were designed for. They are safe to be of aid and can be given with safety to the youngest babe.

Baby's Own Tablets are sold by Medicine Dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

#### May Improve Radio Reception

Magnetic Observations Are To Be Taken In Polar Areas

Better weather forecasts and radio reception may result from a year's international study of magnetic observations in the polar areas, Captain H. U. Sverdrup, noted Norwegian explorer, said.

Simultaneous observations near both poles in 1923-24 will gather magnetic auroral and meteorological observations through a network of stations in the Arctic and Antarctic. The International Committee of Meteorological Directors expects the increased knowledge gained to be of practical application to problems connected with terrestrial magnetism, land, marine, and aerial navigation, wireless telegraphy and weather forecasting.

Miller's Worm Powders are the medicine for children who are suffering from the ravages of worms. They immediately alter the stomachic conditions under which the worms live, and, at the same time, they are subtle and drive them from the system in their effect upon the digestive organs. The result is a return to full operation and ensuring immunity from further disorders from such a cause.

#### Innovations On Ocean Liner

People Crossing Atlantic Have More Than Home Comforts

Among other innovations upon a new 45,000-ton liner that is being built in Italy we are promised a theatre. Already there are ships with garages, swimming baths, telephones, cabarets and the like, so that very soon passengers who make the Atlantic crossing will hardly realize that they are at sea at all.

If some of the old shellbacks who remember the famous tea clippers a century ago could return their comments upon these floating palaces would be amusing, and probably not very complimentary. There are still a number of people who enjoy the freshness and freedom from land worries that are the delights of a sea voyage, and they are not a few. In fact that there are still many ships that are comfortable without being too reminiscent of life ashore.

No Asthma Remedy Like Dr. Dr. Dr. Kelllogg's Asthma Remedy is distinctly different from other so-called remedies. Were this not so it would not have continued its record of relief until known from coast to coast as a remedy of great value. Kelllogg's, the foremost and best of all asthma remedies, stands upon a reputation founded in the hearts of thousands who have known its benefit.

River Being Moved

Because the Trinity River at Dallas, Texas, was restricting the growth of the city, it is being moved two and one-half miles and placed in a new channel. Twenty-five miles of embankment, 30 feet high and 154 feet thick at the base, will be built in the stream when the task is finished.

The Moscow government has approved a change in the calendar and time hereafter will be dated from November 7, 1917, the date of the Bolshevik revolution.

Heal the Sprain with Mianard's.

### Propose World Trip In Sailing Vessel

Would Take About Eighteen Months and Make Real Holiday

Business men in quest of a thorough holiday, who can enjoy an ocean voyage on an old fashioned sailing ship, have an opportunity of an unique trip if they accept an invitation which was reported to the Montreal Board of Trade at its council meeting recently.

The council was advised of a proposed round-the-world trip in a square rigged sailing vessel of about 3,500 tons gross registry, sailing from New York on or about September 15 next. The trip will take about eighteen months and stops will be made at practically all the principal ocean ports of the world. While the vessel is equipped with auxiliary engines, it is expected that there will be very little used and that as nearly as possible the voyage will conform to the conditions prevailing in the old sailing days. The ship will be manned by a capable captain and a large crew, and excellent passenger accommodation will be provided. As the accommodation is limited, only about fifteen couples will be taken as passengers.

#### Little Helps For This Week

"Commit thy works unto the Lord, and thy thoughts shall be established."—Proverbs xvi. 3.

When first thy eyes unveil, give thy soul leave To to the life, our bodies but fore-run The spirit's duty. True hearts spread and leave Unto their god as how's to do the sun.

Give Him thy first thoughts then; so shalt thou keep Him company all day, and in Him sleep.

—Henry Vaughan.

Every morning before we cross our threshold, before we make a single plan or appointment for the day, we must give ourselves unto our Father's business. We are not, as we sometimes do, to determine what we will do, and then devote it to God, but we are first to devote ourselves to God, and ask Him what we shall do.—Alexander McKenzie.

#### Man Without a Country

San Holovrut, Rumanian, who fought for Canada in the Great War, is officially a "man without a country." Though an alien, he is permitted the liberty, for U.S. federal immigrations have tried twice in vain to find a land to which they could deport him.

Most of the street accidents in England are among people between 15 and 25 years old.

Turkey is conducting a campaign against juvenile gambling.

### London's Moving Stairways

Will Be Speeded Up To 150 Feet a Minute

The moving stairways connected with London's famous underground railways are to be speeded up. At present this speed is 80 feet per minute. Experiments are being made with a staircase travelling at 150 feet a minute. Regular passengers who slip on and off the escalators with agility, would be glad to have them go faster, but the many who still regard them as perilous innovations will be more inclined than they are now to use the omnibuses.

## Third Fortnightly Crop Report

(Continued from page 1.)

reported from the area lying North of Edmonton, though not extending to the Peace River District. A large area to the South and East of this City received a supply of much needed moisture. At present all parts of the Province report sufficient moisture for immediate needs. Frost has done considerable damage to trees, shrubs and early garden plants but only slight damage to Field Crops.

All wheat is seeded on 75 per cent above ground. Oat seeding is complete with the exception of oats for green feed, and barley is 75 per cent sown. Growth is slow but the grain is of good color and establishing a good root system. The crop has gone in early and having sufficient moisture for germination is away to a good start.

All spring rye and 90 per cent of sugar beets is seeded. There is a slight increase in the area devoted to sugar beets.

Weeds are unusually bad in early sown fields. Slight damage is reported due to wire worms and cut worms.

Correspondents generally agree that an increased acreage has been sown of sweet clover, alfalfa and grasses. Hay and pasture crops are making excellent growth and livestock is progressing favorably.

Don't forget Oyen sports, July 1.

A ball game between the Kenmaul "Boys" and the Capton "Ukrainians" played at Lundberg School last Sunday, resulted in a win for the former by a score of 32-9. The Kenmaul ball club will hold a date in Lundberg School on Friday, June 6.

Bills are out advertising Chinook sports on Wednesday, June 4. A ball tournament between Youngstown, Chinook, Cereand Oyen, basket ball, ladies' soft ball and children's sports are included on the program.

## About Town and Country

Mr. and Mrs. C. D. McMillan and family of Rose town, Sask. who were weekend guests of Mr. and Mrs. T. C. Scott of Sibbald, were visitors at the Fuego oil well last Sunday.

Chas. P. Snyder's garage and implement office has been recently redecorated and shown up very attractively on the corner of Main Street and the main highway.

Mr. and Mrs. G. S. Peck left last Thursday for Calgary, en route to Cochrane, Alta. where they will visit their son Hubert.

Mr. J. T. Smith returned last Friday from Calgary after spending a few days in the city on business.

The hail storm of Sunday afternoon gave a precipitation of .33 inch. This was followed in the night by a light steady shower for a further .65 inch.

Mr. and Mrs. Chas. L. Dunford and family were weekend visitors in Medicine Hat.

Mr. Jack Naismith of Coronation was an Oyen visitor over the week-end.

Rev. and Mrs. H. C. Woods left last Monday by auto for Edmonton, where the former will attend the annual Alberta conference of the United Church of Canada.

A large number of residents of Oyen and district attended the sports held in Alsask last Saturday.

Died—On Wednesday, May 28 1930, W. W. White of Oyen. The funeral will take place in Oyen on Friday, May 30, at 2 o'clock in the afternoon.

Mr. J. W. Allen of Edmonton was an Oyen visitor over the week-end.

Mr. and Mrs. W. V. Miller, Warren and Joan, left by motor last Friday afternoon en route to Calgary where they will spend a few days.

The interior of the post office in Oyen was redecorated last week.

A. F. Key, editor of the Drumheller Mail, was nominated as Labor candidate in the Drumheller constituency. Mr. F. C. Moyer will contest the riding as Independent.

There was quite a fair representation of Oyen residents at the Elks carnival held in Youngstown last Saturday.

Miss J. Morrison of Cereand was a visitor at the home of Mr. and Mrs. H. E. Bradford last Thursday.

Miss Pearl Harvey arrived in Oyen last Monday from Red Deer and is the guest of Mr. and Mrs. H. E. Bradford.

Mr. A. O. MacArthur, managing director of the Fuego Oil Co., has a limited number of transfer shares in his possession, which he is offering for sale at the low price of 70 cents each, every cent of which will be turned in to finance well No. 2. In view of the large holdings and present prospects of the company, he considers this the cheapest oil stock in Alberta today.

## Merrickville Wins Victoria Day Shield

Merrickville made a clean sweep of the Municipal District of Bertawan rural school field day, held last Saturday.

The field day, sponsored by the Merrickville S.D., and the first event of its kind in this section of Alberta, was an unqualified success. Nine schools competed and a total of five hundred and eighty-six individual entries were received. The attendance exceeded expectations and parents and children alike all spent an enjoyable day. The sports commenced at 12:30 and lasted till 7:30.

The points won by each school were as follows: Merrickville 94, University 51, Blairgowrie 49, Highland Park 39, Wavy Plains 28, Vernon 11, Ponchaillain 9, West Side 7, Hudson Heights 0.

The individual champions were Norman Norris, Merrickville, 21 points, with Mike Smegielski, University, runner up with 19 points, and Katie Norris, Merrickville, 21 points with Lydia Hanson, Merrickville, runner up with 10 points.

## The Last Month of School

Failure of children to pass exams is often the result of poor health—a fatigued mind in a depleted body. Do not let boys or girls burn the candle at both ends or a nervous breakdown will be the probable result. Keep the child's energy up to par by careful attention to his or her diet. Rest periods are important and of real value after the noon lunch and before the evening meal. A happy unworried mental attitude is essential when settling down to homework. Cultivate confidence in the child's mind. A quiet place to study and a peaceful sympathetic atmosphere will prove most helpful, and lastly, going to bed early every night in the month of June, with windows open, will help to maintain the child's strength, so that later on he will be better to tackle without fatigue the mid-summer examinations.

A copy of the Junior Red Cross Health Rules and literature on "Food for the Family" will be supplied free on request from the Canadian Red Cross Society, 407 Civic Block, Edmonton.

The work of levelling the lot to the east of Mr. F. C. McLean's law office on First avenue east, is being done this week and when completed, the woman's rest room, supplied by Oyen District Builders, will be moved on to it. The building is being repaired and renovated while the lot is being levelled.

Under instructions from Mr. Blue Snyder, I will offer for sale at public auction, at his farm on the north half of Section 21, Township 29, Range 4, (10 miles north of Oyen), his horses, cattle, machinery and household goods, on Thursday, May 29. Sale to commence at 2 o'clock. B. H. Dial, auctioneer.

Under instructions from the executor of the estate of the late John Alexander Brown, I will offer for sale at public auction at his farm on the south-east quarter of Section 32, Township 29, Range 2, (4 miles west and nine miles north of Sibbald), horses, farm machinery, etc., on Friday, May 30. Sale to commence at 2 o'clock. B. H. Dial, auctioneer.

## Gum Dipped

for  
Extra  
Strength  
and  
Mileage

BENEATH the rugged safety tread of tough rubber, Firestone Tires have the strongest, most durable cord construction ever known. Layer upon layer of cords are scientifically twisted for greatest strength and elasticity—then dipped in pure rubber which protects every fibre against internal heat and friction. Gum-Dipping doubles flexing life and adds thousands of extra miles of dependable, trouble-free service. Only Firestone Tires are Gum-Dipped—No other tire has its advantages. Because of this extra process, Firestone tires hold all world records for mileage and endurance.
